SUMMARY

I design, ship, and operate production AI agent systems: multilingual voice receptionists (Twilio, ElevenLabs, Claude), autonomous agent harnesses with persistent memory, and the full-stack systems around them (TypeScript, Flutter, Supabase, Cloudflare). Founder of DAKISS Media, where I ship live systems for businesses in the US and West Africa as sole engineer. Native English and French; also Bambara/Dioula and More.

SELECTED SYSTEMS (PUBLIC, CLICKABLE)

- **VoiceForge** — open-source, provider-agnostic voice-agent framework: core interfaces plus reference adapters (Twilio, Anthropic Claude, ElevenLabs, Supabase) and a Cloudflare Worker template. The architecture I ship production receptionists with, extracted and opened.
- **nafole** — Telegram-to-Claude-Code bridge: multi-turn agent sessions driven from a phone, persistent file-based memory (MEMORY.md pattern), user-ID allowlisting, adapter-based chat surface.
- **SD Express** — production site and backend for a package-shipping business in Ouagadougou: Cloudflare Pages, Pages Functions, D1, HMAC-session admin auth, GitHub Actions auto-deploy. Migrated off a rented AI site platform in 3 days, solo.
- **Eau Shalom ops app** — 4-role (owner, manager, driver, vendor) Flutter + Supabase operating system for a bottled-water business, run daily across two continents: 13+ tables with row-level security, 20 migrations, 57 automated tests on the order-to-cash loop, WhatsApp notification worker.

EXPERIENCE

Founder & Engineer — DAKISS Media

Bowie, MD | Jan 2024 – Present

- Design, build, and operate AI agent systems and full-stack platforms for small businesses in the US and West Africa, as sole engineer from requirements to production.
- Ship multilingual (EN/FR) AI voice receptionists on Twilio + ElevenLabs + Claude: call handling, booking flows, and data handoff to the business's systems.
- Build agent infrastructure used daily: Claude Code harnesses, persistent agent memory design, content automation (Puppeteer rendering pipelines, scheduling APIs).
- Stacks in production: TypeScript/Next.js, Flutter/Dart, Supabase/PostgreSQL with RLS, Cloudflare Workers/Pages/D1, Vercel, GitHub Actions.

Professional driver — private car service

Nov 2020 – Present

Marketing & Communications Lead (volunteer) — Burkinabe Association of the DMV

2022 – Present

- Own communications and event execution for a 200+ member community organization.

SKILLS

- **Agents & AI:** Claude API and Claude Code (tool use, MCP, subagents), agent memory and state design, voice pipelines (Twilio media streams, ElevenLabs TTS, Deepgram STT), prompt and eval design, Python for agent tooling.
- **Languages & frameworks:** TypeScript/Node, Next.js/React, Flutter/Dart, Python, SQL.
- **Infrastructure:** Supabase/PostgreSQL (row-level security), Cloudflare Workers/Pages/D1, Vercel, GitHub Actions.
- **Human languages:** English, French (fluent); Bambara/Dioula, More (native).

CERTIFICATIONS & EDUCATION

CompTIA A+ (2024) · Digital Marketing Certificate, Generation USA (2023) · A.S. Biology, Polytechnical Univ. of Bobo-Dioulasso (Burkina Faso)
